## Summary

I've always been a great problem solver, an independent introvert, and a technophile obsessed with the latest devices. Today, I'm working from home as a software engineer for Ernst & Young, and I get to show off all these elements of who I am.

I started learning to code when I was a teenager, though it was always more of a hobby than a career focus. After a college education in engineering, and continuing to pursue that hobby, I realized software engineering was the right field for me.

Since then, I've worked on countless projects and have been involved with a handful of notable mnc's. Today, I'm working as a senior software engineer with the amazing team at Ernst & Young, and am getting into ReactJS on my own time.

I'm familiar with a variety of programming languages, including Dotnet Core, C#, Azure, Angular, SQL Server Typescript, JavaScript, HTML, CSS, SCSS, jQuery, Bootstrap, Tailwindcss, Angular Material UI and ReactJS, but I'm always adding new skills to my repertoire. I'm also eager to meet other software engineers, so feel free to connect!

## Experience

### Senior Software Engineer

EY

Dec 2021 - Present (3 months +)

Microservices Development in .NET 5 and Micro Frontend Development in Angular 8 along with Azure SQL for Database. Use Azure Repo for source control and Azure DevOps for CICD.
